DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 11/29/05 has been entered.

Information Disclosure Statement

2. The references listed in the Information Disclosure Statement submitted on 11/28/05 have been considered by the examiner (see attached PTO-1449).

Allowable Subject Matter

3. **Claims 1-26** are allowed.

4. The following is an examiner's statement of reasons for allowance:

Regarding *claims 1, 7, and 8*, in the examiner's opinion, it would not have been obvious to one of ordinary skill in the art at the time the invention was made to have the system, as claimed, include the features of storing the extracted link information, if the received file is a text-based file, in an output file separated from the electronic file, wherein if the electronic file is one of the text-based file and the CAD file, the output file is used to generate a separate display

Art Unit: 2622

layer to display the extracted information in addition to information of the raster image, and wherein the separate display layer is inserted into the electronic RFQ format file such that the information of the display layer is displayed in response to an activation from the RFW format file. The closest prior art, previously noted as Edwards *et al.* (U.S. Patent Application Publication US 2002/0069295) and Eichstaedt *et al.* (U.S. Patent Application Publication US 2002/0016725) each fail to expressly disclose these features. Further, none of the references filed in the Information Disclosure Statement dated 11/28/05 expressly disclose each of the features in the claims, and would not be motivated to be combined with another reference to achieve the current claimed inventions. These limitations, which were added in the amendment dated 6/2/05, render the claims allowable.

Regarding **claims 9, 15 and 16**, in the examiner's opinion, it would not have been obvious to have the system, as claimed, include the features of inserting information from the symbol output file into the RFQ format file as a separate display layer, such that the symbol information is displayed as a CTQ layer in the RFQ format file. The closest prior art, previously noted as Edwards *et al.* (U.S. Patent Application Publication US 2002/0069295) and Eichstaedt *et al.* (U.S. Patent Application Publication US 2002/0016725) each fail to expressly disclose these features. Further, none of the references filed in the Information Disclosure Statement dated 11/28/05 expressly disclose each of the features in the claims, and would not be motivated to be combined with another reference to achieve the current claimed inventions. These limitations render the claims allowable.

Regarding **claims 17, 25, and 26**, in the examiner's opinion, it would not have been obvious to one of ordinary skill in the art at the time the invention was made to have the system,

Art Unit: 2622

as claimed, include the features of adding link information from the link output file to the RFQ format file, wherein each link is displayed in a separate display layer overlaying the RFQ format file, and wherein the link properties of each link is displayed in response to an activation from the displayed RFQ format file. The closest prior art, previously noted as Edwards *et al.* (U.S. Patent Application Publication US 2002/0069295) and Eichstaedt *et al.* (U.S. Patent Application Publication US 2002/0016725) each fail to expressly disclose these features. Further, none of the references filed in the Information Disclosure Statement dated 11/28/05 expressly disclose each of the features in the claims, and would not be motivated to be combined with another reference to achieve the current claimed inventions. These limitations, which were added in the amendment dated 6/2/05, render the claims allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
